**RE: FINAL MONTHLY ACTIVITIES REPORT FOR THE MEME CONDUCTED
MARCH 15, 1999 AT THE NAVAL SUPPORT ACTIVITY MID-SOUTH,
MILLINGTON, TENNESSEE; FACILITY I.D. NO. 0-791718**

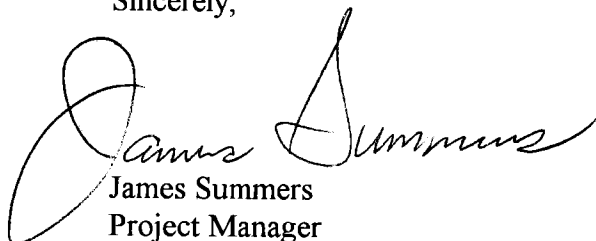

Dear Mr. Karlyk:

BAT Associates, Inc. (BAT) is pleased to submit the above referenced final report. Comments received from the draft review have been incorporated. Three additional copies of this report have been forwarded to Randy Wilson.

As you are aware, this MEME event was performed for a duration of eight hours at ten extraction points, consisting of the initial three hours at monitoring wells MEM-2, MEM-8, MEM-13, and MEM-14, the ensuing three hours at MEM-1, MEM-3, MEM-7, and MEM-12, and the final two hours at MEM-6 and B-3. Due to the small amount of hydrocarbons removed from MEM-6 and B-3 over the past events, BAT recommends omitting these two wells from the extraction array setup. We recommend adding an additional hour of extraction to the initial four well array (MEM-2,-8,-13,-14), and an additional hour to the second well array (MEM-1,-3,-7,-12).

Should you have any questions or require additional information, please contact me at (423) 481-8105.

Sincerely,

James Summers
Project Manager
